# WORKINGGROUP ACTIVITY

# Regulatory efficiency Working Group

## **Research Application Tracking System T4 103**

Implemented; worked well in Year 2

## **Efficacy requirements**

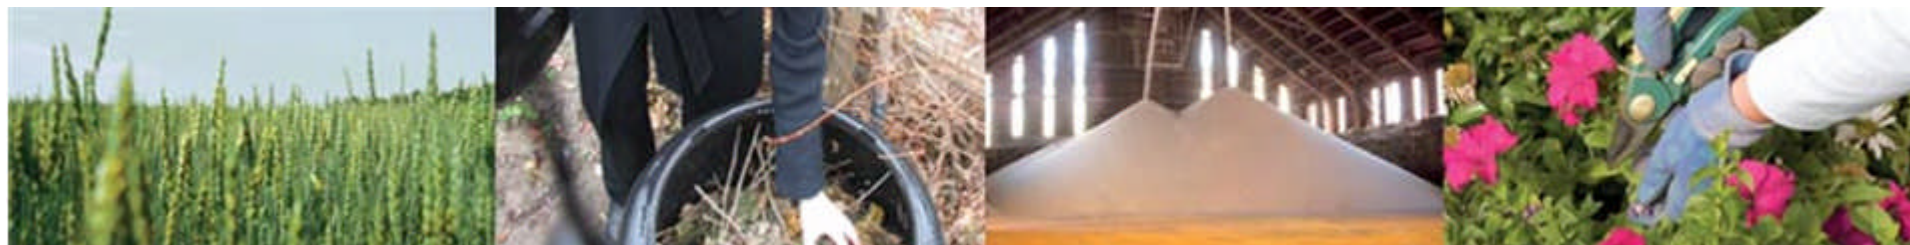

Efficacy task force made recommendations on triggering efficacy, number of trials, greenhouse data requirements & efficacy for micro-nutrients. Many now incorporated into regulations

## **Assessment of economic impact of the regulatory framework**

?????

## **Training**

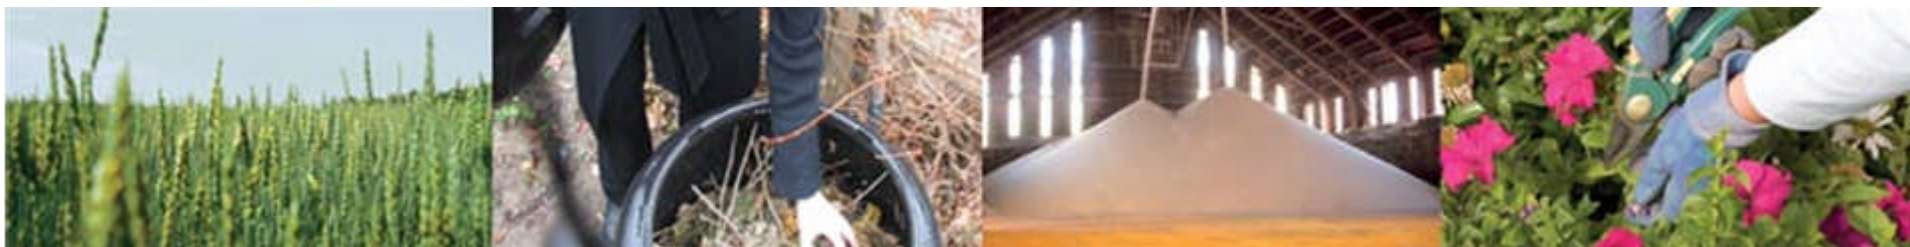

First training session on application process held fall 07

# Marketplacemonitoring & labellingWG

- Review & recommendations on quality assurance in the marketplace
- 3<sup>rd</sup> party monitoring system
- Establishing monitoring standards
- Focused enforcement approach on non-compliant products

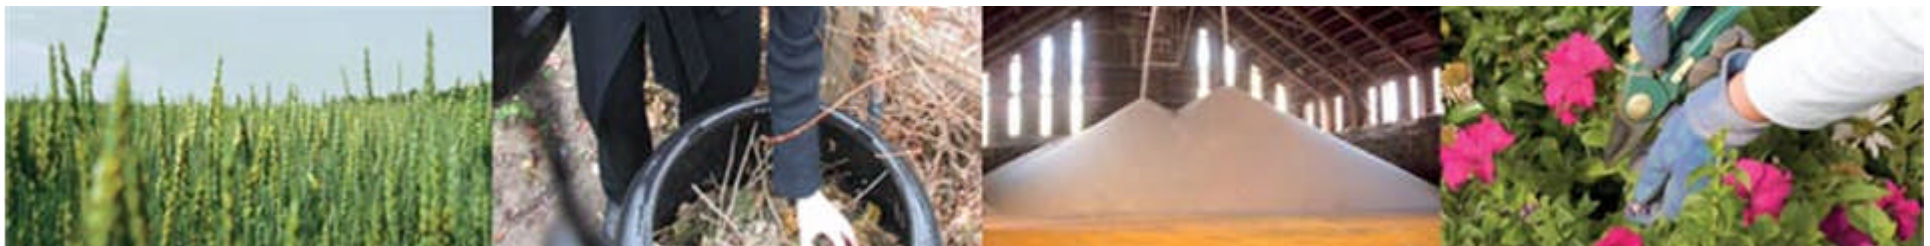

# MicronutrientsWG

## Issues under discussion include

- Chelated Micronutrients
- Oxy-sulphate and Oxide Micronutrients
- Micronutrient-Specific Data Requirements

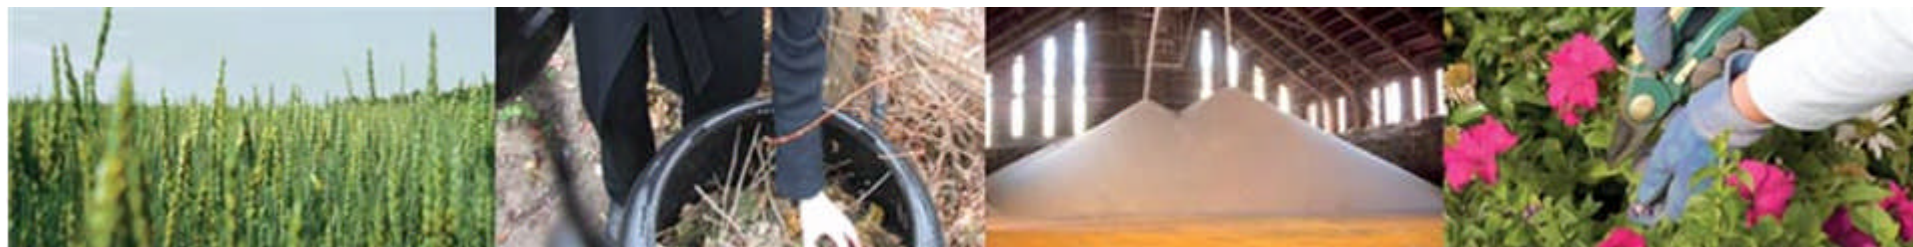

# BiosolidsProducts WG

## Identified three highest importance issues

- 1) QC & QA information requirements
- 2) Registration & efficacy requirements  
Cross Canada BioSolids Regulations  
Definition of Biosolids
- 3) Policies & standards harmonization  
Presented two position papers

# Communications & Industry Outreach WG

- Communicates role of CFPF & benefits of regulation
- Develops strategic direction for CFPF communications
- Develop key messaging
- Supports internal communications needs of Exec & WG's
- Reviews communications products produced for CFPF
